BACK

Kasher Fridg-eez™ is designed to hold down the fridge or freezer light switch during Shabbos and Yom Tov. This keeps the light turned off until the Fridg-eez is removed.

General Directions for Use:

1. Locate light switch on fridge or freezer.
2. Clean area around switch with damp cloth then dry well.
3. You will need to position the two small velcro strips on either side of the light switch. Peel short tabs from adhesive backing. Press to desired location on both sides of switch.
4. Before Shabbos or Yom Tov, lay the long Fridg-eez strip over light switch and secure ends to the two short tabs.
5. After Shabbos or Yom Tov, pull plastic ring to remove long Fridg-eez strip.
6. Do not place or remove the Fridg-eez strip during Shabbos or Yom Tov
