

From the makers of Kosher Lamp & Kosher Clock, comes the next great thing you sorta but not really need but is cool cause it's shticky:

The BUG CHECKER Portable Light Board.

Orthodox Jews can eat fresh vegetables again - our children don't have to look anemic to show that they are frum anymore! Say goodbye to wet sleeves and the trouble of searching for bugs on lettuce now you can search each individual leaf and be done with it!

Some quotes from their release:

HEALTHIER FOOD AND MORE VARIETY

You don't have to avoid the fresh vegetable section of your supermarket any longer.

Now you can have really great salads, prepare more interesting dishes and up your vitamin intake. Think of the health benefits of eating dark leafy greens rich in antioxidants. What a gift to yourself and your family!

Gotta love this!!!! WHAT A GIFT!
