BACK

The **Kosher Fridg-eez™** is designed to hold down the fridge light switch during Shabbos and Yom Tov. This keeps the light turned off until the Fridg-eez is removed.

**Be sure to affix this before Shabbos.*

General Directions for Use:

1. Locate light switch on the refrigerator.
2. Clean area around switch with damp cloth then dry well, otherwise it will fall off.
3. Position the two small velcro strips on either side of the light switch. Make sure that the velcro is as close to the light button as possible. Peel short tabs from adhesive backing. Press firmly on desired location on both sides of switch.
4. Before Shabbos or Yom Tov, lay the long Fridg-eez strip over light switch and secure ends to the two short tabs.
5. After Shabbos or Yom Tov, pull plastic ring carefully to remove long Fridg-eez strip.
6. Do not place or remove the Fridg-eez strip during Shabbos or Yom Tov
